Clothing & Furn

Sample Call Report

Added Calls and Maps to list on bottom.

There are 2 types of calls that will be associated with calls for each route: Confirmed Calls and Specials. Confirmed calls are people who received a card in the mail and called in to confirm they would have a pick up. Specials are calls from people that did not get a card in the mail but need a pick up. They are assigned to the nearest route that is scheduled but does not actually live in that route.

When they click on the number under calls, a list report will pop up in separate window showing info on calls.

When they click on map a pop up with the route will come up.

They will use these 2 features of this page on the day the route is scheduled to give the call report and map to the driver.

Maps-

They want the specials that are assigned to route to appear on route.

Powered by Epic Solutions

Added columns for Zips, Average Lbs and Notes

Zips will be all zips that are included in Route and will be stored in Route Table.

Demographics will be stored in a Demographics table and should be a pop up window when clicked.

Average Lbs will come from Route History table.

Notes will come from Route History Table. If there are any notes they want the word "Notes" to appear in Red.

Added Notes to History Window.

Powered by Epic Solutions

This form is used when the driver gets back from picking up the route. The donors are asked to place the postcard they receive on the donation with their name, email and phone number for tax purposes. The operators will enter the customer's information and what they donate. There will be a record for each donation. This could be tied to the Customer table to auto-populate when the phone number is entered. The customer table will have one record for each customer. If the customer does not exist in the Customer table it will need to be inserted there too.
